'The Scarlet West'

*The Old Days—The Bold Days—
The Days of Courage—of Thrill;
of Adventure—They're Here!*

Come, live with the sturdy pioneers in battles for life and love; come sit by their twinkling camp fire and listen to their tales of adventure and roaring songs—the while they builded a nation with their blood. With ROBERT FRAZER and CLARA BOW.
Note—The Scarlet West is Champion Theatre's gift to those who missed The Covered Wagon.

United Church Holds Supper

The Ladies' Aid and the United Church Board were sponsors for a supper served in Campbell's hall on Tuesday night, when some hundred of those interested were present. In addition to a get-together proposition the object of the meeting was to draw attention to the necessity of financial assistance for church activities. The supper was a real one and was highly appreciated by everyone, the viands served being of a character to tempt the most indifferent appetite. The principal speaker of the evening was Rev. R. W. Hilbert M.A., B.D. of Calgary, who gave a very interesting outline of the aims of the United Church. An address by Forrest Cool and the treasurer's report were also features of the evening, being interspersed by musical numbers, including a solo by G. M. Campbell, a piano duet by the Misses McGillivray and a piano solo by A. Hunt.

The result of the meeting was highly satisfactory to the church officials, and it is considered that the increased interest in church affairs which was aroused will have a highly beneficial and lasting effect.

Elks Are Increasing At Champion

There was quite an exodus from Champion to Staveloy on Tuesday, the occasion being the meeting of the Elks lodge, several candidates for initiation going from here. We will soon have a big enough band of Elks to have a camp, or whatever it is, right in Champion. Those from Champion and vicinity who were initiated on Tuesday night were J. M. Moffatt, G. L. Dupar, J. Lobban, J. D. Henderson and J. A. Ruggles, of the Guess Ranch. The latter is said to have enjoyed himself to a greater extent than the other candidates, although all report a splendid time.

The Rev. G. W. Kerby, B.A., B.D., of Mount Royal College, Calgary, will address an open meeting of the parent-teachers association on Monday, March 21st, at 8 p.m.

A general audience is requested as the opportunity of hearing a speaker of Dr. Kerby's ability is rare.

Three wells to test out the new Milk River structure for gas and oil will be sunk this summer as part of a large program of operations planned by the Canadian Western Natural Gas Co. and the Union Oil Co. of California.

The new million dollar tourist hotel built by the Great Northern Railway in the Waterton National Park, near Cardston, will be opened this season. It is to be known as the Prince of Wales hotel.

Mrs. A. W. Jopling and her mother, Mrs. Sayles, arrived here on Wednesday from Colorado Springs. Mr. Jopling, who was to have met them at Great Falls, only got as far as Coats on the trip, where he fortunately met the travellers.

Mrs. Theriault wishes to announce to the Champion ladies and vicinity on Tuesday next March 15, a display of millinery, new spring coats, silk and sport dresses. Don't forget the day.

Mrs. N. H. Stebbins Dies at Gleichen

The death of Mrs. N. H. Stebbins occurred at Gleichen on Sunday, February 27th, aged 47 years and 11 months. The deceased with her husband lived near Lomond for some years, moving to Gleichen about 1922. The family consisting three sons and one daughter, are all well known in the Lomond district, and will have the sympathy of the community. The funeral took place from Armada to the Lomond cemetery on Wednesday, March 2nd, where Mrs. Stebbins daughter was buried in 1919.

Hard Times Dance Thursday, Mar. 17

The Hard Times dance under the auspices of the Women's Institute takes place in McCullough's hall on Thursday evening, March 17th. The W.I. has such a reputation as entertainers that it is almost unnecessary to assure everyone that the extra incentive of the seventeenth of Ireland means an extra good time for those who attend. Prizes will be awarded for the best lady's and gentleman's costumes of hard times extraction.

ALSTON NEWS

The Alston Dramatic Club is working hard on a four act comedy drama which will be presented in the near future. Watch Chronicle for later announcements.

Alston held their regular U.F.A. meeting on Tuesday, March 8 and a carload of posts were ordered through the Beaver Lumber Co. to Champion.

Mr. Nesbit of the Educational Dept. gave an hour's discussion in the interest of the wheat pool. His talk was instructive as well as interesting to the audience.

The regular meeting of the Golden Rule W.I. met at the home of Mrs. Albert Winnup on Thursday, March 3rd. A very interesting paper on agriculture was given by Mrs. Geo. Wighton. After the paper a demonstration of the uses of over-wear aluminum was given and an appetizing lunch served.

Miss Louise Peterson is visiting in Vulcan for a few days.

The Ladies' Aid will meet at the home of Mrs. G. A. Orr on Thursday, March 16th.

A Board of Trade meeting will be held in McCullough's hall on Monday evening at 8 o'clock. A general attendance is requested.

D. Watkins returned home during the week from Iowa, where he and Mrs. Watkins had spent the winter. Mrs. Watkins will follow later.

C. McLou and family moved on Wednesday from the Sisson building, which they have occupied since their house was burned, to the Alberta-Pacific residence, recently vacated by Irv. Fisher, the latter moving to the Schroeder farm.

The tea hostesses recently have been Mesdames Dupar, H. Gill, Anderson, McCullough, Williamson, Campbell, Cowell, McIntyre, Ryan and Latiff. The proceeds of these teas are for church purposes and have been so successful they will be continued.

JOPLINGS

YOUR CHANCE TO SAVE!

To make room for our new spring stock of Men's Clothing we are going to quit handling the following lines and are going to close them out at reduced prices which cannot fail to appeal to you.

THURSDAY, MAR. 10, 1927

NOTES AND COMMENT.

The provincial budget was balanced this year with a small surplus, but an increase in the tax on gasoline to three cents per gallon would indicate the government has no idea of reducing expenditures in any direction or of reducing taxation. There may be justification for this imposition for absolutely necessary expenditures, but there could be dissent from the statement that taxes in this province are a real burden. A continuance of prosperous years may permit the burden to be borne, but any misfortune to the crop would arouse opposition in every direction to the fiscal policy of the government.

During the past two years, Canadian agriculture, mining, fishing, manufacture and transportation have been experiencing a fundamental prosperity which indicates an insistent world demand for the varied products of Canadian industries. That a country with a population of less than ten million people should have exported \$1,271,000,000 worth of goods in 1925, and \$1,269,000,000 worth in 1926, implies a tremendous productivity per capita. Canada is now the leader in the production of newspaper, asbestos, nickel, cobalt, and salmon, and furnishes the world's largest exportable wheat supplies. Since Canada also stands second in the per capita number of telephones in use and in the production of automobiles and lumber; third in gold and silver production; seventh in steel production and tenth in that of coal, it is evident that the prevailing prosperity is dependent upon a healthy condition in many industries rather than upon a temporary expansion in some single line.—Royal Bank Monthly Letter.

Approximately 200 tons of alfalfa from the Lethbridge district has been ordered by the British Government for shipment to China. The hay is being supplied by the Southern Alberta Co-operative Association.

Spring is again in the air and preparations for the busy season are already under way on every hand? It is doubtful if at any period during the past ten years more confidence has been felt in crop prospects by the farming community.

Combines promise to be a considerable factor in harvesting this year's crop. The prevailing opinion appears to be that while a combine should not be relied upon entirely, it would be a very rare season when three or four farms would not provide plenty of work for a combine where it would have a distinct advantage over the binders.

The next birthday—March 17.

Twenty three farmers in the Fort Vermilion district, in the far northwestern part of Alberta, 650 miles straight north of the international boundary, last year raised a total of 9,200 bus. of wheat and 13,000 bus. of oats. Their average for wheat was 25 1/2 bus. and for oats the average was 25 1/2 bus. an acre. They also had an average yield of barley of 30 bus. to the acre. This is the furthest north point in Alberta raising grain, and is some 200 miles further north than the farm of Herman Trolle on which was raised the world's champion wheat and grain of 1920.

With the spring and summer months looming ahead, the lovers of outdoor recreation are again looking to their tackle. The March number of Rod and Gun and Canadian Silver Fox news which has just appeared, has many interesting articles for those outdoorsmen. A very complete article on outfitting a long canoe trip by C. P. Storey is an outstanding feature of the issue. Many other useful wrinkles are included in the regular "Fishing Notes" and "Outdoor Talk" and "Guns and Ammunition" departments. Many interesting experiences are told in the hunting stories such as "A Holiday in the Rockies." Bonnycastle Dule writes this month on the subject of the Nova Scotia men who fish for lobsters. Number 9 of Canadian Silver Fox news contains a great deal of useful material. Rod and Gun and Canadian Silver Fox News is published monthly by W. J. Taylor, Limited, Woodstock, Ontario.

—it SAVES THE FARMER'S THRESH BILL—
Put Your Threshing Dollars Where They Will Last

Why The Red River Special Line Offers You More For Your Money
Hyatt Roller Bearings
Alumite-Zerk Lubrication—Armco Iron
When you put your threshing dollars into a thrasher of the Red River Special Line, they will last for years to come.
The already long life of the Red River Special Line is still further lengthened now, by the use of Armco iron for the sides, deck and all other sheet metal parts. No other separator has it. Hyatt Roller Bearings, that need never be removed, keep pulleys and shafts in line, save power and give the machine the smooth steady motion needed for good threshing and long life.
Alumite-Zerk Lubrication sets so many misuses formerly lost in oiling up, and by more thorough lubrication adds to the life of the machine.
With all these improvements you will find the famous 4 Thrasher of the Red River Special Line, the most efficient combination of machinery ever devised for threshing all grains and seeds and for getting the grain from the straw.
Also the N & S Harrow and Feeder, with straw and seed conveyors that control the flow of grain under all conditions, the up making the cylinder easy to reach.

Exhaustive Tests Are Made On the Comparative Merits Of Garnet and Marquis Wheat

After having conducted exhaustive tests on the comparative merits of Garnet and Marquis wheats during early maturing cereals developed within recent years, the Federal Department of Agriculture reports that "we cannot recommend Garnet as a substitute for Marquis in districts where the latter variety may be depended upon to thrive successfully. The report points out, however, that even in those districts where conditions are identical to the proper development of Marquis wheat, it may often be profitable for the farmer to cultivate Garnet wheat in part of the area devoted to wheat."

The report points out that "from the standpoint of milling and baking qualities, Garnet undoubtedly does not rank as high as Marquis, all things considered, although it seems entitled to a place among the good milling wheats. The chief point in regard to which Garnet is open to criticism is in color of the flour. This without doubt is more 'creamy' than Marquis. Since, however, bleaching and maturing processes have become so highly developed and are becoming so generally practiced, this difference of the color of Garnet would appear to be appreciably minimized."

Commenting on the results of the comparative baking tests of the two wheats, the report says that "generally speaking, the flour of Marquis absorbs a little more water than that of Garnet, and consequently, is inclined to produce a little higher bread yield."

Garnet wheat, however, by maturing from five to ten days earlier than Marquis, has a decided advantage in the early frost belt.

The department summarizes the result of its experiments as follows: "On the average of all tests conducted to date on the comparative merits of Garnet and Marquis as well as on provincial farms Garnet outdoes Ruby quite definitely, but there does not appear to be any marked difference in yielding ability between the former variety and Marquis. This statement would seem to apply generally to tests conducted by farmers as well."

"On the other hand, Garnet appears capable of outyielding Marquis by a substantial margin in specified districts, notably those in which an early variety has a distinct advantage."

"Garnet matures from five to ten days earlier than Marquis and about a day ahead of Ruby. Under certain conditions the difference in yield between Garnet and Marquis may be considerably greater than the above, owing to some hereditary factors in the variety, which has a distinct advantage in the early frost belt."

"In strength of straw Garnet is superior to Marquis and Ruby, being slightly stronger than Ruby, but not quite so strong as Marquis. Under some conditions, however, Marquis shows distinctly greater strength."

"In tests conducted at the experimental laboratory, Winnipeg, Garnet did not display any resistance to any of the seven physiologic forms of stein rust seed."

"Although this variety may not possess rust resistance, it may prove of value in rust areas by partially escaping this disease owing to its ability to mature early."

"In the case of samples obtained from the Dominion experimental farms and stations in the prairie provinces in 1921 and 1922, Garnet weighed slightly less per measured bush than did Marquis. On the other hand, records at the Dominion farms at Brandon, Indian Head, Thompson, Swift and Lacombe over a period of six to eight years, show that Garnet and Marquis averaged 62 pounds and 61.9 pounds per bushel, respectively. Where the supply of moisture is ample, Garnet appears to weigh, if not to excel, Marquis in weight per bushel. Thus, over a 15 year period at Ottawa, Garnet averaged 61.1 pounds and Marquis 62.7 pounds per bushel."

Pure Bred Stock
In the last ten years purebred horses have increased fifty per cent. in Canada and twenty per cent. per cent. according to Hon. John S. Martin, Ontario Minister of Agriculture. The value of Canadian horses, he said, is \$750,000, a third of which is owned in Ontario. A big improvement is seen in the class of sheep and hogs.

A female has been recently discovered, which a factor in the Peninsula makes what is said to be practically unobtainable gain.

Large beetles, found recently in Santa Rita, could be sent to Blinn as a large roach.

W. N. K. 1671

Fox Farming Flourishes

45,000 Foxes Imported and Tanned for Registration Purposes

During the inspection season which lasted from October 13th January, about 45,000 foxes were inspected and tanned for registration purposes, according to the annual report of the Dominion Department of Agriculture. The pup crop was an average one and the price for the foxes were reported as higher than those of the previous year. An usual, thousands of foxes were exported to the United States and in addition a number of European countries came to Canada for foxes from the following countries: Germany, France, Russia, Norway, and Great Britain. Norway purchased 500 pairs and Russia gave some of her famous sable in exchange for silver foxes. Having established a market in Europe, fox breeders are looking forward to a good trade for some years to come.

Advocate More Sheep

Canada Should Produce a Greater Share of Its Own Wool

Advocating more sheep on the smaller farms in Canada, the Hon. Livestock Commissioner, speaking at the annual meeting of the Ontario Sheep Breeders' Association, stated that farmers need not be afraid of extending their sheep holdings. The Dominion imports 145,000, 100 worth of woolen goods while producing less than \$5,000,000 worth of wool. There was no reason, he argued, why Canada could not produce a greater share of its own wool. The wool of the finer grades, Canada can manufacture cloth largely from her own raw material, which will compare favorably with anything in the world.

The Canadian Dress is Medium Exceedingly smart is the new Canadian dress shown here, and a style suitable for both the town and country. The dress is made of a light material, having a fitted bodice and a full skirt. The jacket has a facing and collar in one, a waist, and smart patch-pocket. The long duffed sleeves are finished with bands, and a trim belt is worn. The dress is made of a light material, having a fitted bodice and a full skirt. The jacket has a facing and collar in one, a waist, and smart patch-pocket. The long duffed sleeves are finished with bands, and a trim belt is worn.

Plains Not Only Spot Fires But Help Conquer Them

"Every year," said Hon. William Flinchbaugh, Minister of Lands and Forests in the Legislature, "we have the same number of fires starting in the bush. Now we can't control the idiot who throws a burning cigarette away, but we can spot a fire when it is still small and prevent it from spreading."

How is it done? Ask the "Falcon," for instance, says Mr. Flinchbaugh. On July 4, 1924, at 4 o'clock in the morning, forest patrol machine "Falcon" with Pilot Russell, and Air Engineer Chesebrough, spotted a fire in valuable spruce timber in unsurveyed territory around Clearwater Lake, far out of the beaten path of the forest fire ranger. What happened?

Well, the "Falcon" flew direct to base at Pine Bluffs, 45 miles distant, for assistance. It flew the course 15 times that day putting in more than 11 flying hours. To the scene of the fire it transported ten men, 1,500 pounds of food, innumerable blankets, 200 feet of hose, extra pumps, two canoes and other materials with which to prevent the spread of the conflagration.

Furthermore, Pilot Russ also flew his "Falcon" to Lac Seul to bring back the same night the fire was out, with less than an acre of timber consumed. "Falcon" and Mr. Flinchbaugh, spotted a fire in a half-dozen stories of this kind that I might relate. Our planes nowadays, not only spot fires, but conquer them, too."

Ontario, according to figures supplied by the Minister, spends approximately \$1,000,000 yearly on forest fire protection. It is worth it! Well, in 1925, there were 16,000 acres of timber destroyed by fire, but there were in 1925, although the Province reported 1,105 fires—only less than the previous year. There's a reason for that, undoubtedly.

"And the 'Falcon,' for instance, can tell you," says Mr. Flinchbaugh.

Manitoba Tax Collections

Increased 1925 Over 1924

Provincial collections under the Manitoba Tax Commission for the year ending 1925 exceeded \$2,225,000, or an increase of more than \$500,000 over the figures for the previous year, according to the report of the Manitoba Tax Commission. The figures are thought to point to an early surplus to be announced by Premier John Bracken at the close of the fiscal year, ending April 30th. Virtually all the major revenue producers show increased returns as compared with 1925.

Live in Two Men

State boundary line means little in the lives of Mr. and Mrs. Dwight Charles, through whose lands the Manitoba-New Hampshire state line runs. Mr. Charles owns his lands in Maine, and Mrs. Charles owns the lands in New Hampshire. They now live in Maine and sleep in New Hampshire.

A paid \$3,000 for Penny Book

A book which once sold for one English penny, brought \$2,000 at auction New York. The volume was a first edition of Edward Fitzgerald's "Rubaiyat of Omar Khayyam," published 1859.

Fools occasionally find opportunities, but wise men make them.

Beauty and the Beast in the Rockies

Miss Mary Cross, of Calgary, Queen of the Canadian beauty held at Banff, recently knows how to handle a cayenne, and when it comes to packing a load on one's back is learning from Bill Boats or any other body who has been at that section of the Rockies. The cayenne also appears to be enjoying the sport since he is taking a peak at the fair lady who is stretching his thigh. Miss Cross was one of the attractions at the Big Winter show at Banff, where not only winter sports, but some much more intimately connected with summer, such as open air swimming, was indulged in. Thanks to the warm British Springs of that favored locality, The Carnival was a record success in all ways this year.

Seed Production Becoming More Profitable in Canada

In observing that seed production in Canada is more and more becoming important and profitable, the Dominion Minister of Agriculture in his report for the year ending March 31st last, is pleased to be able to say that Canadian grown seeds now command reasonable foreign markets by virtue of their winter hardiness, vigor of growth and standard quality of grade. Many kinds of grain, grass and vegetable seeds for which there is demand from abroad are continually on the increase in surplus exportable quantities and by their excellence have proved thoroughly adapted imported stocks on our home markets. Alfalfa, barley and brown top or Rhode Island lent grass, the Minister states the most notable increases in seed crop acreage, the first named having developed in six years from 235,000 acres to 525,000 acres and from imports of 15,000 tons to an export of 60,000 bushels.

Referring to the work of the seed branch of his department the minister notes that lately seed is receiving special attention in Northern Ontario, where the crop has particularly well been in the State of Michigan. Manitoba where a centre has been organized for the production of seed oats, yields of 100 bushels per acre have been secured. It is here being found possible to supply other districts with superior seed, and that efforts are being made towards the production of the production of timothy seed, Kentucky blue grass and fescue to displace the imports.

Developing Hydro Power

Five Million Horse Power to be Developed in Western Ontario and Northern Manitoba

Applications for permits to develop hydro power in Western Ontario and Northern Manitoba are being made to the Department of Agriculture at Ottawa has published a convenient pocket edition of the Hydro Act, 1922 which farmers and mill owners generally would do well to possess themselves of, and which can be had free of cost by merely dropping in an unstamped postage card to the Publications Branch at the Nation's capital.

Idle Lands in Manitoba

Plenty of Land Accessible to Railways Available for Settlement

There are immediate settlements on potential lands in Manitoba for 1,152 families, according to Prof. R. W. Murray, speaking at the convention of the Manitoba Agricultural Association. These idle lands at present unused, are accessible to railways, schools, churches and other modern conveniences. Moreover, it is stated, there are approximately 5,500,000 acres of unused lands in the province, most of it being yet without the alienation of title facilities.

Fools occasionally find opportunities, but wise men make them.

Carbonized Coal May

Prove To Be Solution Of Canada's Fuel Problem

Market for Bacon

Strong Competition Developing in European Countries in Supplying Bacon for British Market

The December review of the livestock situation by the Markets Division of the Dominion Trade Commission is one deserving of more than ordinary attention. It is to some extent a commentary on the year's trading. With British industry in more of a settled state than it has been for many months the hope is expressed of an improved export trade. The most significant remarks are regarding the bacon market. The supply of hogs, the review says, was stable during the year, and consequently found the outlet most remunerative. No very material increase in production is expected for 1926. It is noted that the Canadian producer will see to it that supplies are brought back to meet liberal volume, with the strict provision that there is a very marked increase in the volume and percentage of export sales. The review also notes that the Canadian producer will see to it that supplies are brought back to meet liberal volume, with the strict provision that there is a very marked increase in the volume and percentage of export sales.

The comments in the review of the bacon trade cannot be taken without the following sentence, which well merits extra consideration: "Our place in the market for hogs can only be maintained on the basis of steady supply of good products, but along with this the product must be of an increasing improved quality so that we may successfully hold our own against the increasing quality of the competitive product."

In 1925 the supply of select hogs increased in Alberta and Manitoba, but showed a falling away in the totals for the whole of Canada in 1925 being 116,000, and in 1925, 161,281.

Charming "Cottage Industry"

Canaries Exported From English Town to All Parts of World

Visitors to the ancient English cathedral city of Norwich may recall to a vague memory of the cathedral tower, the noisy churches and gateways. How many of them became aware that it is also a city of canaries? The Finnish weavers settled there in the sixteenth century brought along their canaries as well as their looms with them. The breeding of canaries is that unexpected "cottage industry."

A correspondent of the London Morning Post says that they are found in every street in the town, and the Norwich canary has been widely spread over the world.

In October the export season began. In the hundreds of thousands of birds, at least 1,000,000, will be sent abroad this year. They are packed in single pairs, each pair, sitting before the cages, rubs a rock along the surface of a glass bottle. In this way it is possible to identify the pair of birds, and to persuade even the dullest bird to sing its accompaniment. Toward sunset, in single pairs, they are compelled to perch high above the trees in their nests. The farmers are not justifying themselves rapidly in general, but the canaries are doing well.

The "darker-colored plumage," so much admired, was originally obtained by feeding a bird on cayenne pepper for a fortnight. Spanish paper is used. "Color feeding" has been elaborated. Certain shades are obtained by mixing cinnamon with the food. The birds are fed on a special "cayenne" diet. Henceforth, "Norwich" will not suggest the man in the moon or even porridge to him, but the much-improved and much-admired little emigrants from the Canary Isles.

Belgium Cows for Princess

With special ceremony Princess Arctid, wife of Crown Prince Leopold, was presented with a jewel of the nation's wedding gift. For months past Belgium's most skillful craftsmen had been engaged in the work of growing which is ornamented with gems from Belgium's colonies and consists of a band of brilliant set in platinum mounted on a magnificent large Crown diamond.

Rumay Macdonald May Visit U.S.

Macdonald, former prime minister, is considering visiting the United States in April. Mr. Macdonald, it is reported, has been asked to visit the United States for a long time to make the trip his last reward from his countrymen.

Port Arthur Elevators in the Twin Cities

Additional to three grain elevators at Port Arthur, increasing capacity to 2,000,000 bushels, per month, will be added to the existing capacity of 32,500,000 bushels in the four grain elevators at Port Arthur.

The addition of three grain elevators at Port Arthur, increasing capacity to 2,000,000 bushels, per month, will be added to the existing capacity of 32,500,000 bushels in the four grain elevators at Port Arthur.

According to one of Canada's most experts the carbonized coal produced from slack coal by the new process will be a fuel equal to best anthracite at present placed on the Canadian market.

"It will be reasonable and it is claimed that \$14 a ton will be the market price for carbonized coal. It is expected that the process will provide a new source of fuel for the Dominion."

"The process of low temperature carbonization converts all types of coal into a high quality fuel, and both Nova Scotia and Alberta coals can be successfully treated. The new product will be given a special name, which at present is being kept secret."

"Plans are practically complete for the construction of two 1,000-ton per day plants in Western Ontario, and one in Ottawa of similar capacity, as a beginning. These plants will be operated by subsidiary companies. Steps are being taken also for the organization of similar subsidiary companies in Montreal and Quebec for similar plants."

Morgan J. O'Brien, president, in political circles of Carbonized Coal, which is the name of the company. The Office as head of the syndicate seeking the federal charter.

Massey Praises Pool

Says Canadian Wheat Pool the Greatest Agricultural Cooperative Scheme in the World

"The Canadian Wheat Pool is the greatest agricultural cooperative scheme in the world," said Vincent Massey in his first interview following his arrival at Washington as the first Canadian minister to the United States.

Mr. Massey was asked if Canada had a farm problem such as the United States. He replied that the newspaper representatives how the Canadian farmers are finding in cooperation a cure for their financial troubles.

"The formation of the Wheat Pool is a tremendous tribute to the resourcefulness and energy of the Canadian farmer," Mr. Massey declared. He explained, in reply to an inquiry that the Canadian Government had been asked to take over the scheme, but that it was a farmers' scheme entirely formulated by them and aided, of course, by the Government. The scheme was approved by the Government, but there had been no action for the Government to take in it.

"The Canadian farmer, like yours," he said, "has had his period of prosperity for his produce and has been compelled to pay high prices for his necessities in goods. The farmers are not justifying themselves rapidly in general, but the canaries are doing well."

GREAT BRITAIN TO GIVE RUSSIA ANOTHER CHANCE

London, Announcing in the House of Commons that Great Britain will not break off diplomatic relations with Soviet Russia, Foreign Secretary Chamberlain emphasized a policy of giving Russia another chance.

This policy was endorsed by the House when the Liberals raised a discussion on the subject, questioning the vote British went to Russia, charging the Soviets with disseminating anti-British propaganda.

Sir Austen Chamberlain, in behalf of the Government, said it was desirable that world peace should be assisted by the continuation of diplomatic and economic which resulted from the struggles of a few years ago. He said a breach with Russia was bound to have a reaction in other countries. It was made suddenly before the world realized what the provocation and could place responsibility on the British shoulders.

Whatever the provocation, he continued, a sudden breach could not ever exist without having a reaction on the whole European situation. With out retreating anything it had said in its note or otherwise about the conduct of Soviet Russia, the British Government's view was that Russia should be given another opportunity to compare its conduct in the future with its past.

At the same time that the Foreign Secretary assured the House that relations would not be broken off, he remarked that there were limits to the Government's patience with regard to anti-British propaganda.

New British Embassy

Million Dollar Structure is to be Erected at Washington

Washington, Great Britain is to have a million dollar embassy in Washington.

Plans for the building, drawn by Sir Philip Lanyon, revealed at the magnificent Indian capital at Delhi, have been approved by the United States Commission of Fine Arts, the first has been completed, and work will begin during the latter part of this year.

The entire structure will be in the style of the British tradition. It will be of red brick with white stone foundations and will be in the style of the British tradition. It will be of red brick with white stone foundations and will be in the style of the British tradition.

To Tour Western Canada

Governor-General and Viscountess Willington Will Visit West

Ottawa, Their Excellencies the Governor-General and Viscountess Willington are to leave Ottawa on Saturday, March 19, on an extended tour of Western Canada. It is proposed to pay a similar visit to the Maritime in July.

In making this announcement, officials of the Governor-General's office said their excellencies would stop off at all the capitals of the western provinces, and most of the principal cities. It was proposed to return to Ottawa about May 1.

LOYAL—HEAD TO COME

Three-Year Program Planned

Minister of Railways Will Introduce Plans for C.N. Railway

Ottawa, Hon. Charles Dunning, Minister of Railways, gave formal notice in the House of Commons of his intention to introduce the Canadian National Branch Lines program for the next three years.

Mr. Dunning also gave notice of a motion to provide for the refunding of Canadian National Railway obligations and to provide for the refunding of securities authorized by the Dominion but not exceeding twenty million dollars.

Attempted to Introduce Bill

Ottawa, An attempt to introduce a bill in the House of Commons, which would give a group of anti-British Conservatives, desiring to break off relations with the Soviet, attempted to introduce a private bill to prevent British recognition of any foreign government. The bill was defeated by British propaganda.

Japan Crosses Strait

Ottawa, The Japanese battleship Ise and the cruiser Tone were ordered to be sent to the Strait of Malacca, where they were ordered to be sent to the Strait of Malacca, where they were ordered to be sent to the Strait of Malacca.

Reindeer Investigation

Government Would Provide Food Supply for Reindeer of North Country

Ottawa, A wireless message has been received by the Northwest Territories branch of the Interior Department from the Northwest Territories. The message stated that the reindeer herds are now on a 1,200 mile trip across Alaska and the Northwest Territories. The message also stated that the reindeer herds are now on a 1,200 mile trip across Alaska and the Northwest Territories.

The two Fozzies went into the North country last June and will not come out until the spring of 1928, when they will make their report to the Dominion Government on all phases of the reindeer question. It is expected that within a few weeks the little two-wheeled expedition will be in the delta of the Mackenzie River, where the reindeer herds are found. The expedition is expected to be in the delta of the Mackenzie River, where the reindeer herds are found.

Department of Revenue

New Name is Proposed for Department of Excise and Customs

Ottawa, A bill to amend the Department of Excise and Customs, which was introduced in the House of Commons by Hon. W. D. Fisher, Minister of Customs, which was introduced in the House of Commons by Hon. W. D. Fisher, Minister of Customs, which was introduced in the House of Commons by Hon. W. D. Fisher, Minister of Customs.

At the same time that the bill was introduced, the Minister of Customs announced that the Department of Excise and Customs would be renamed the Department of Revenue. The bill provided that the Department of Excise and Customs would be renamed the Department of Revenue.

PROPOSED TAX ON FURS FROM NORTH COUNTRY

Ottawa, For the first time in 20 years a tax is to be placed upon furs from the Northwest Territories. Within a few days Hon. Charles Stewart, Minister of the Interior, will introduce a bill into the House of Commons to empower the Commissioner of the Northwest Territories to impose a tax per pound on furs.

At the present time about \$2,000,000 worth of furs are taken from the Northwest Territories each year by trading companies without revenue to the federal government. The proposed tax is to be levied on the value of the furs at the time of exportation. It is expected that the tax will be levied on the value of the furs at the time of exportation.

Proposal of Western Livestock Men Opposed

Eastern Producers Against Change Advocated at Regina Conference

Ottawa, Eastern livestock producers and representatives of the livestock exchanges in this part of the country who met the minister of agriculture last week, and discussed the proposal of the Regina conference of Western livestock men regarding contemplated amendments to the act in the livestock and livestock products act.

At the Regina conference the livestock men proposed that the actual administration of stockyards be taken out of the hands of the exchanges and placed directly under the department of Agriculture.

The livestock men proposed that the actual administration of stockyards be taken out of the hands of the exchanges and placed directly under the department of Agriculture.

Druggist Gave Her Advice

Miss Ruth Horowitz, Bronx, N. Y., writes: "Having been troubled with indigestion caused by constipation for several months, my druggist advised me to try CARTER'S LITTLE LIVER PILLS. I said they are good for a hundred different ailments. I people only know the value of them. I can safely say that since I am taking them, and only one each night, I feel like myself again and can eat most anything."

"Those who suffer from sick headache, indigestion, biliousness, tired-out and aches feeling, when due to constipation, will find relief in taking CARTER'S LITTLE LIVER PILLS. CARTER'S LITTLE LIVER PILLS in red packages, 25c, and 75c. Try them to-night—to-morrow refreshed. All druggists."

Revival of Old Idea

Sir John Macdonald suggesting Name "Kingdom of Canada" Before Confederation

There is something unique and unexpected in the revival at this late date of a Western Progressive member, Mr. Garfield, of the old idea of calling the country the "Kingdom of Canada." It may not be generally known that this title was put forward by Sir John A. Macdonald during the negotiations leading to Confederation. Sir John was quite eager for the name Kingdom and pressed his claims during the drafting of the British North America Act in London early in 1867. The sixth draft of the bill contained the title "Kingdom of Canada," replacing the words "United Provinces" of the preceding draft, and Sir John made every effort to retain the royal term.

The change to Dominion of Canada was made at the instance of Lord Dufferin, then Foreign Minister, who, as Sir John said in 1929 in a letter to Lord Knutsford, "feared the first name would lower the sensibility of the Yankees." Sir John in the same letter defended his proposal and said that, had it been accepted, he was sure the Australian colonies would have been anxious to be placed in the same rank.

It is doubtful if, after sixty years' use of the word "Dominion," there will be much any good reason for a change.

Found Airplane Trip Easy

Few Days Unpleasant, Says Lady Howe, After Long Journey

"Flying eleven days straight off is much easier and less trying than I had expected," said Lady Mary Howe, the only woman who has flown 12,000 miles on six voyages, when she stepped to the baggage platform of Victoria station, after an air trip to India, which she had taken in a Sir Samuel Houston, the air liner.

Fog had prevented the completion of the last stage from Paris to London by air, and the two were obliged to make the tedious channel crossing.

The British air minister and his wife left London for their journey by air plane on the morning of December 27 and landed at Delhi on January 8.

It was no fair weather trip, said Sir Samuel. "We had start and stop in the Persian Gulf and enroute on the northwest frontier of India, snow and rain, and often adverse winds."

Lady Mary supplemented the description by saying: "Three days were distinctly unpleasant, while five days out and three days returning for home were very happy. We felt at every height in the air."

This successful journey was the first woman to complete the course in divinity.

Mrs. Chi Yu Chia of Mulden, Manchuria, was presented by Dean MacRae of the theological faculty, a diploma of the United Church of Canada for her studies and will become a teacher of theology in the United Free Church of Scotland's seminary at Mulden, now being opened to women students on a vocational basis.

Graduates at Shantung Christian University

First Woman Student Receives Diploma in Midst of War

While clutches of Chinese revolutionaries aimed at her on her way to Shantung Christian University has completed her academic year with full attendance and, under authority granted by the Parliament of Canada, has graduated sixteen Chinese students of high caliber.

Acts Like a Flax in Relieving Coughs

It is a fact that Flax is a very effective remedy for coughs, colds, and bronchitis. It is a fact that Flax is a very effective remedy for coughs, colds, and bronchitis. It is a fact that Flax is a very effective remedy for coughs, colds, and bronchitis.

Good Roads From U.S. Boundary

Improving Highways From Points in Alberta to the U.S. Boundary

Main highways running from points on the boundary line between Canada and the United States are to be substantially improved this year from points in Alberta on the boundary through as far as Edmonton, the provincial capital, and to some of the most attractive scenic spots in the Canadian Rockies. The number of tourists coming from the United States to visit the scenic wonders and other attractions in Alberta is increasing rapidly every year. Both the Federal and Provincial authorities in Canada are doing everything possible to encourage visitors from the United States and other countries to spend a holiday in the Dominion.

Air Mail Facilities Offered to Canada

U.S. Plan Would Save Day on Coast to Coast Letters

Air mail routes in the United States have been made available to Canadians. For an extra ten cents per half ounce letters from Canada will be carried by the coast to coast air mails operated under contract with the United States government.

Letters destined to British Columbia are carried to Elko, Nevada, by the coast to coast air mail, and from there trans-shipped to Vancouver or Victoria. A net saving in time of at least a day is ensured. Letters to United States points on the Pacific coast are delivered at least two days earlier on the average.

The announcement of the United States post office department points out that the extra ten cents for air mail routes must be prepaid from Canada in United States postage stamps.

Little Helps For This Week

The merciful man down goes his own soul. Prov. xl, 12.

The quality of mercy is not strained; It drops as the gentle dew from heaven Upon the place beneath; It is twice blessed: It blesses him that gives and him that takes.

—Shakespeare.

We are unmerciful when without necessity we are judges of our fellows, when we suspect meanness, dishonesty, untruthfulness, and so speak of worse surmises—in others. The merciful in thought give us room in their hearts for surmises such as these. They do not secretly impute evil.—Richard Chenevix Trench.

Constructing Speed Boat

Frenchman Will Attempt to Cross Atlantic by Boat

An attempt to cross the Atlantic ocean in 15 hours will be made in a motorboat under the command of M. Hugot, the French automobile manufacturer.

The boat is made of steel construction of the submarine and will have eight motors. It is a craft type. It is 45 meters long, is expected to make 140 miles an hour in a calm sea, 100 miles an hour in an average sea. The boat will make a trial trip soon on the Seine.

THE NURSING MOTHER

Often Finds Herself Weak and Feeling Worn-Out

The nursing mother needs more than plenty of rest. The demands upon her health are many and severe. Her body suffers from the strain of her child, and she is often tired, weak, and nervous. Bible Printed in Esperanto

Last Year Saskatchewan Printed One Copy and One New Testament

The book which will long be the last of the world's best seller is in print in Saskatchewan in Esperanto. In 1925 one copy of the Bible was printed in Saskatchewan at that international language as well as one copy of the New Testament.

Bachelors Tired in Italy

Here's what it costs a bachelor to stay a bachelor in Fascist Italy. According to the terms of a law just passed, bachelors between 25 and 35 years of age must pay a special tax of 35 lire per annum. Bachelors between 35 and 50 must pay 20 lire and those over 50 must pay 25 lire. An additional income tax will also be imposed upon marriage.

Keep Minard's Liniment in the stable.

Be good and you will be happy—so happy as you can under the circumstances.

A price mark looks all right on almost anything except a man.

Tommy Chalmers, who has resided in this vicinity for some time, left on Tuesday for a visit to Scotland.

Mrs. J. Byrne wishes to thank the Ladies' Aid for gifts of flowers during the illness of her father, V. S. McClure.

Mr. and Mrs. Robt. Tyler arrived home from spending the winter in London, Eng., on Thursday of last week. The travellers were looking hale and hearty, and showed every sign of having enjoyed their trip thoroughly. From their own statements their appearance was no misnomer.

The death occurred at Silver City, New Mexico, on Friday March 4th, of Edwin A. Woodhull, manager and editor of the "The Independent," the leading newspaper at that point. The deceased was in his 55th year; had held the position he occupied at the time of his death for some twenty years. Before leaving Manitoba in 1906, owing to ill health, he was employed on the staff of the Winnipeg Free Press, and was widely known among newspapermen at that time. He was a brother of the proprietor of The Chronicle.
